[Glyphosate cancer for monograph final 416 16 DAE GA.docx](#)

PV, I QC'd and made my edits. I'm not sure what David meant in his email regarding the pancreatic tumors in rats. The rationale for determining that the pancreatic tumors are not treatment related was already in the text. The language is different from the CARC doc, but the lines of evidence are the same (just used different language to describe it). Let me know if these changes are adequate.

G
